

# Using the Serverless Framework with Node.js on AWS

---

## THE STATE OF SERVERLESS

**Fernando Medina Corey**

DATA ENGINEER

@fmc\_sea [www.fernandomc.com](http://www.fernandomc.com)

# Outline

**Prerequisites**

**Why use a Serverless Framework?**

**Look at Several Frameworks**

**Benefits of the Serverless Framework**

**Concepts we'll be learning**

**What we will be building & new skills**

# Suggested Prerequisites

**AWS Account & AWS Basics**

**JavaScript Exposure - Node.js**

**Understand 'Serverless' - Introduction to AWS Lambda Course**

**Command Line Use**

# “[The] Serverless Framework”

## The Serverless Framework

The specific serverless framework we'll be using in this course. ([serverless.com](https://serverless.com))

## Serverless Frameworks

A general term for any framework that focuses on the Functions as a Service or 'Serverless' paradigm.

# Traditional vs. Serverless Architectures

Traditional Applications

Serverless Applications

# Why Use Serverless Frameworks?

**Standardization and  
Organization**

**Tooling**

**Community**

# What Serverless Frameworks?

serverless

Shep  
(Bustle.com)

SPARTA

Sparta

Zappa

# Some Criteria for Choosing Frameworks

Core  
Functionality

Language  
Support

Infrastructure

Plug Ins

# Why the Serverless Framework?

## Frameworks on GitHub

	 <b>Watchers</b>	 <b>Stars</b>	 <b>Forks</b>
Serverless	 733	 17,952	 1,753
Zappa	 186	 4,428	 431
Apex	 193	 5,785	 362
Gordon	 62	 1,878	 124
Sparta	 9	 351	 26
Shep	 24	 207	 11

# Why the Serverless Framework?

## Enterprises

- Coca-Cola
- Expedia
- Nordstrom

## Startups

- CrazyLister
- Ibotta

June 2017

<http://redmonk.com/jgovernor/2017/07/05/why-serverless-inc-is-crushing-it-right-now/>

# Key Tooling

**Structured  
Development**

**Infrastructure  
Management**

**Reduce Provider  
Complexity**

**Infrastructure  
Independent**

# Infrastructure Providers

Amazon Web  
Services

Google  
Cloud  
Platform

Open  
Whisk

Microsoft Azure

# Language Support

Java

Node.js

Python

PHP

C#

# Potential Serverless Drawbacks

**Obscures Backend  
Infrastructure**

**Permission Hungry**

**Compliance Challenges  
(e.g. HIPPA)**

**Opinionated Development  
Process**

# Course Plan & Concepts

---

# Module Concepts

Up and Running with the Serverless Framework on AWS:  
*Installation, Application Model and Development*

Deploying a Text Notification Website with a Serverless HTTP API:  
*Plugins, APIs and Third Party Integrations*

Scaffolding and Deploying Serverless CRUD APIs:  
*CRUD APIs, Databases and Testing/Debugging*

What is Multi-platform Serverless?:  
*IaaS Risks, Multi-platform/Resilient Architectures, IaaS Agnostic Code*

# The Woof Garden

We help all of your pets grow

Puppy Riley

## Course Scenario

- Building services
- Technical components
- Internal Tools

# Language & Platform Focus

**Serverless Framework:  
Polyglot & Infrastructure Agnostic**

**Focus on Node.js & AWS**

# Course Projects

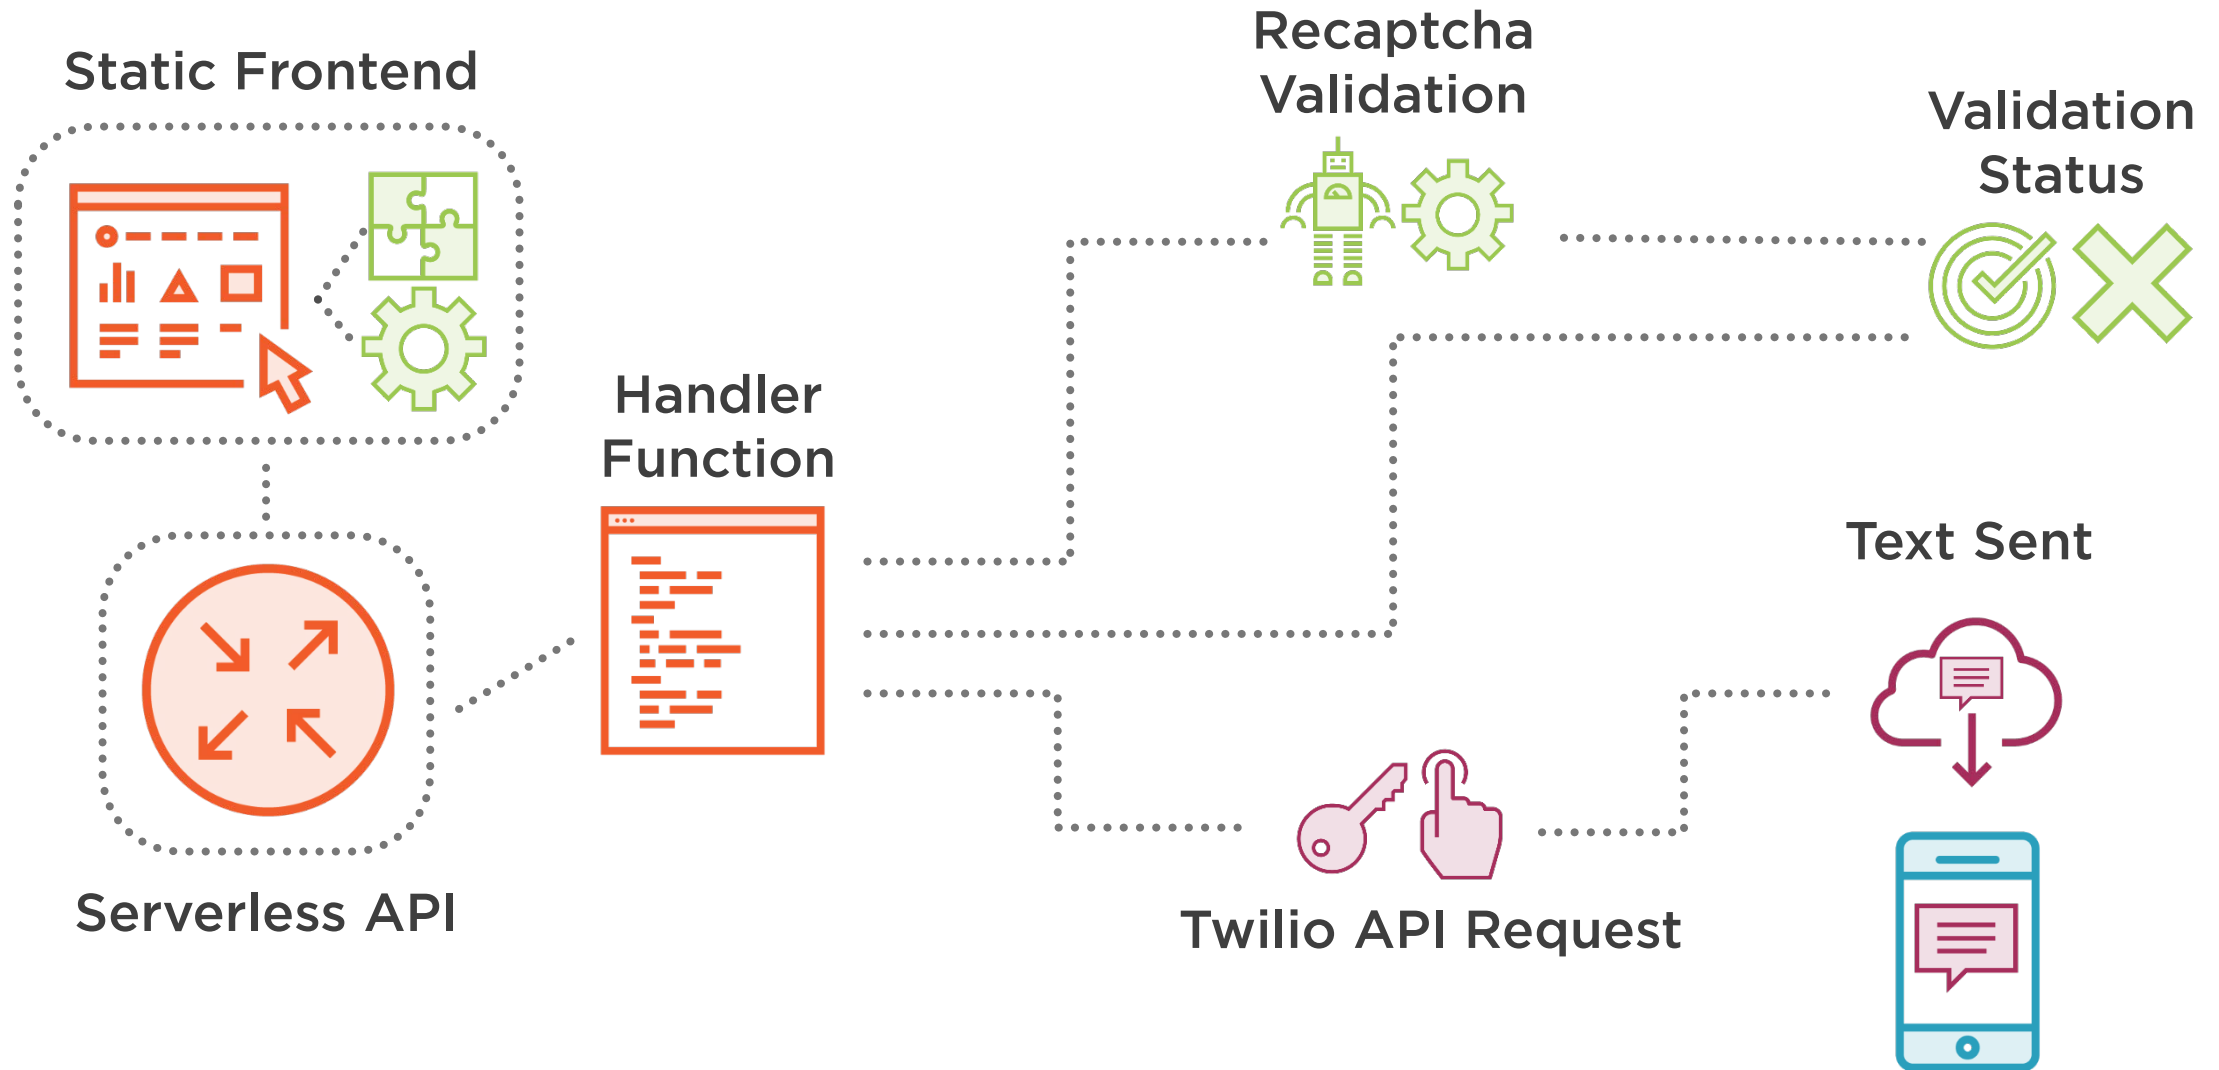

---

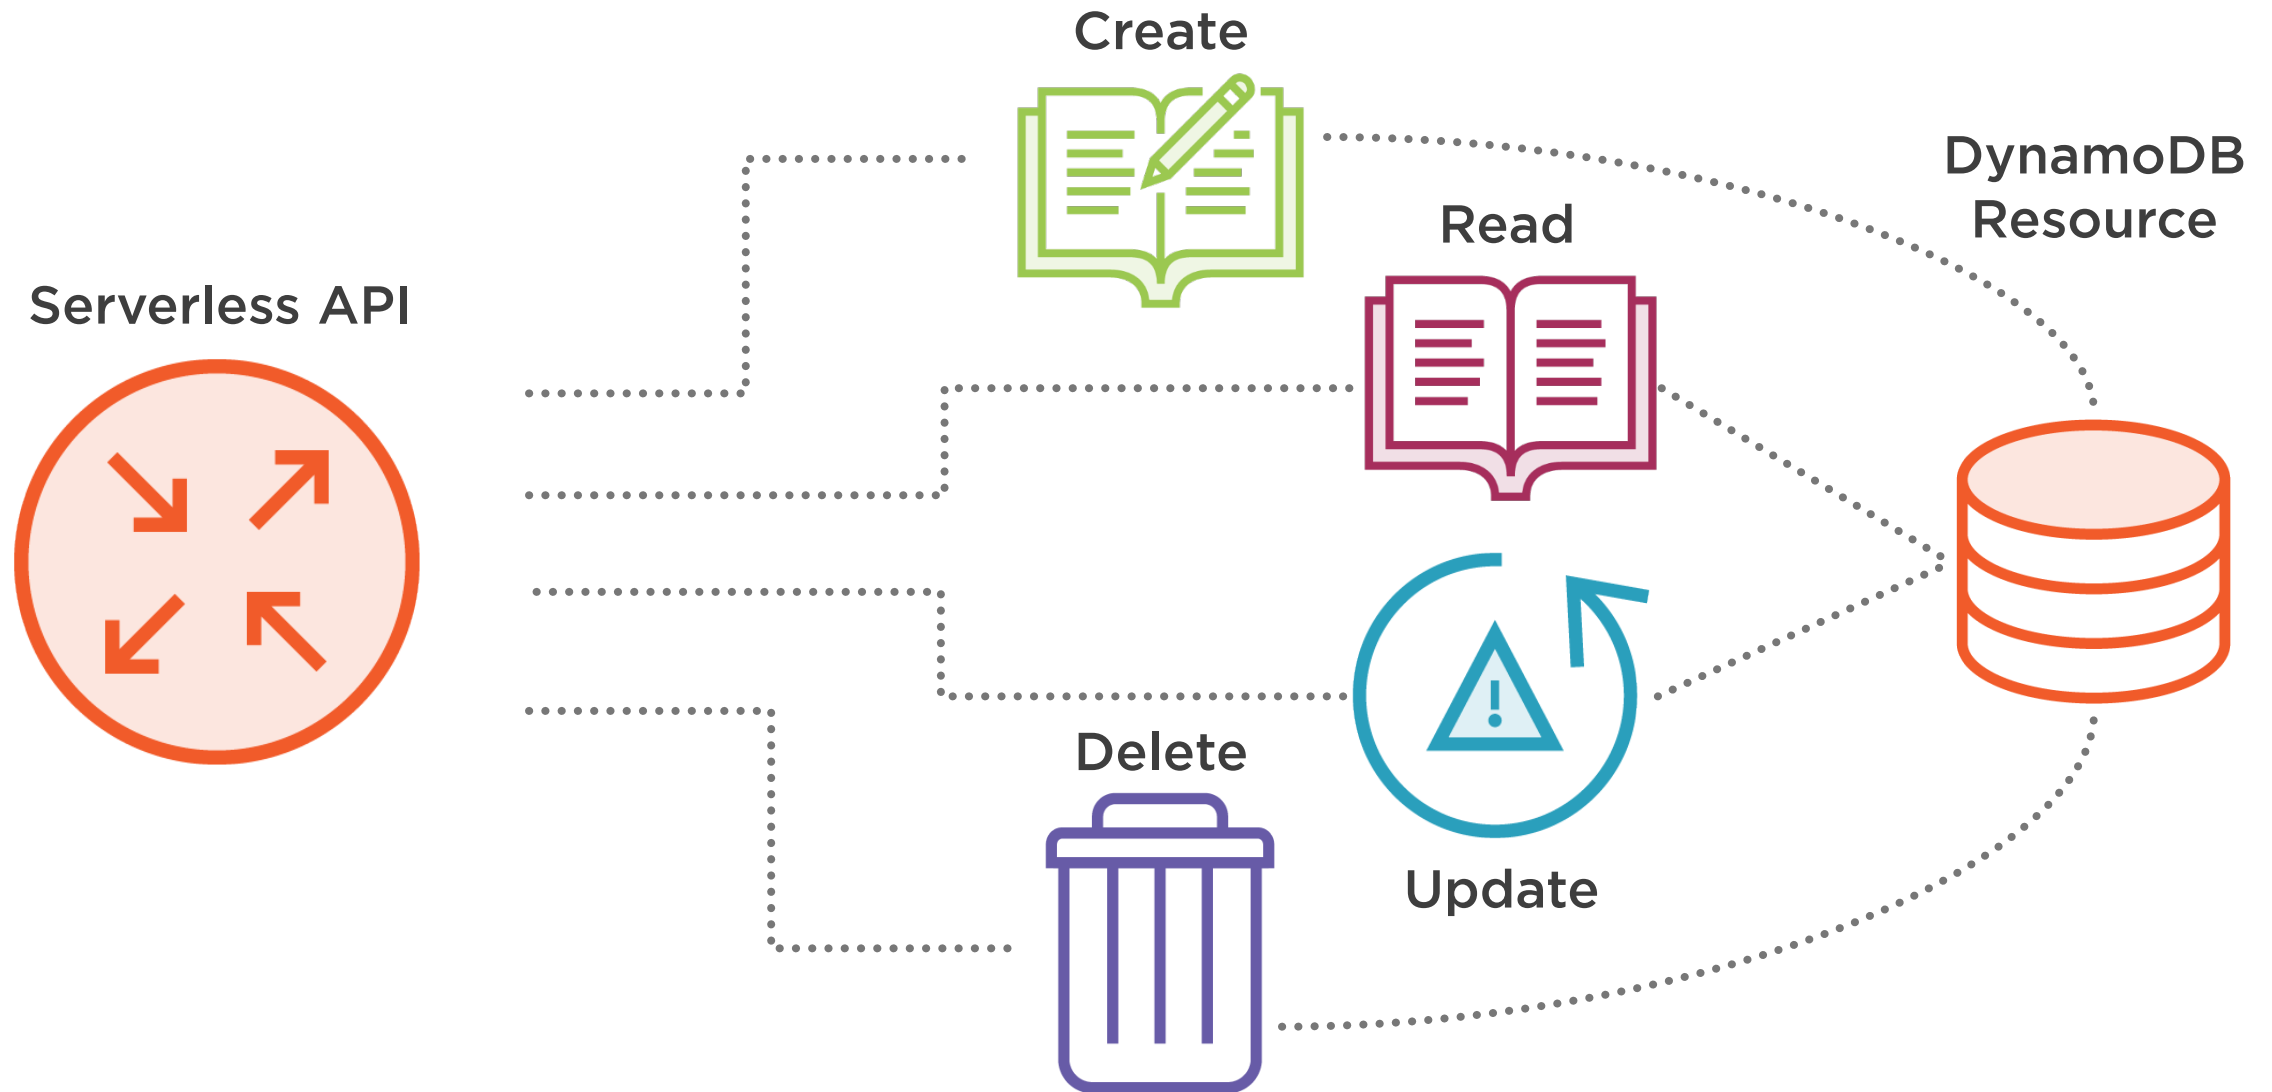

# Up and Running – Email Reminders

# Deploying Our Text Notification Website

# Scaffolding Serverless CRUD APIs

# Review

Understand the Serverless landscape

Learned IaaS providers relationship to Serverless

Excited to build our new projects and skills

Coming Up

- Serverless Framework Setup
- First Serverless Project
